Please find a list of changes we made to our Stage 2 submission, based on feedback from our TA -

1. Updated DDL Commands of USERS based on new implementation of password storage as hashed
2. Added screenshots of missing table descriptions - specifically BUILDS, INVENTORY
3. Added screenshots of missing/updated table counts - specifically USERS, BUILD_DETAILS, PART_PRICING, THEMES, REVIEWS, BUILD_PRICING, FAVORITES, INVENTORY, PARTS.
    a. This now shows 5 tables with more than 1000 rows (out of which 3 are their own entities and 2 are many to many relations)
4. Updated all the queries (especially Query 2, Query 4) and added screenshots for their retrieved results
5. Updated All the indexing done for each of the 4 Queries to use the write indexing attributes based on feedback
    a. Added Explain Analyze analysis for default and then 3 more indexings for each query
    b. Added screenshots for default and indexings for each query
